

# KEYDRILL RIG FLOOR DISPLAY (RFD)

## Overview:

The KeyDrill Rig Floor Display (RFD) can be used with all the popular MWD systems. It is lightweight, rugged and weatherproof delivering critical information to the Directional Driller. KeyDrill's RFD displays not only traditional data such as Inclination, Azimuth, Gravity/Magnetic Tool Faces and waveform graphics, but has a synchronization indicator and is configurable to display other data such as Dip angle, Gamma data, etc.

## Features:

- Supports popular MWD systems with graphic mud pulse display.
- Displays extra configurable data such as Dip Angle, Gamma, etc.
- Extra synchronization indicator shows pump on, pump off, and synchronization status.
- By using with KeyDrill Decoding System, gravity, magnetic field, pump pressure, battery, temperature and even the survey confidential number can be displayed.
- Built in Y-cable allows transmission of transducer and display data to and from the decoder together through a single yard cable or through the KeyDrill Wireless Connection System (KWS).
- Compact, rugged design.
- Highly reliable.

## Specifications:

Operation Temperature: ..... -30° to 75° C  
Storage Temperature: ..... -40° to 85° C  
Dimension: ..... 16"x9"x2.25", Net Weight: 11 lbs  
Humidity: ..... 0% to 95%
